ColorLogic

A powerful, yet easy-to-use PDF Color Server

- Automated solution for color conversion of PDF and image files through ICC and DeviceLink profiles
- Simple, clearly structured user prompting and setup.
- Extraordinarily high speed.
- Based on ColorLogics production proven SmartLink and DeviceLink profile technology.
- Outstanding quality of PDF processing.
- Available as CLI version to be integrated in other workflows, e.g. Enfocus Switch.
- Correction of gradation curves for process and spot colors.
- Supports Multicolor and integrates intelligent spot color handling.

Generate custom, robust ICC Profiles

- First-class ICC output profile generation.
- Creation of abstract profiles.
- ICC DeviceLink technology for RGB, CMYK, Grayscale, and MultiColor and any combination.
- Save any kind of color transformations in a DeviceLink profile.
- High-end Ink Saving module.

Intelligent analysis and optimization of measurement data

- Analyze and correct your measurement data before profile creation.
- Improve your profile quality by working with better measurement data.
- 2D and 3D visualization of your data.
- Support of colorimetric and spectral measurement data from various vendors of spectrophotometers.

DocBees-Reprofiler

- Adopt ICC printer and DeviceLink profiles to modified printing conditions.
- Easy-to-use, wizard based user interface.
- Create a high quality DeviceLink profile for converting your print data to your individual printing condition.
- Uses readings of a printed color stripe to optimize your printer profile.
- Receive a comprehensive PDF report on current status and the result of your optimization.

DocBees-ProfileManager

- Management and analysis of ICC profiles.
- Automatic Profile Report.
- Modify colorants in Multicolor profiles.

DocBees-ProfileTagger

- Analyze and correct color management settings of delivered PDF and pixel data.
- Check image data in a PDF/X file to match the defined output intent.
- Uses Drag & Drop and predefined hotfolders.
- CLI version allows integration into other workflow solutions such as Enfocus Switch.

Install precalculated DeviceLink Profiles

- Various sets of precalculated and fine-tuned DeviceLink Profiles.
- Specially compiled for a number of standard tasks and printing conditions (ISO standards, USA standards, newspaper standards, gravure standards, etc.).
- Designed for color conversion from one standard to another.
- DeviceLink Profiles for ink optimization are also available.
